Author Index

Alberts, J.J. 191

Bacskai, J.G. 170
Bahemann-Hoffmeister, A. 83
Balcarová, O. 97
Baranowska-Dutkiewicz, B. 149
Baranski, T. 172
Bardoděj, Z. 45
Barta, T. 179
Bartolucci, G.B. 163, 167, 169
Bátora, I. 175
Beke, G.J. 281
Bencze, K. 83
Bercovitz, K. 229
Bergert, Kl.-D. 111
Bergschicker, R. 168
Berrow, M.L. 235
Brugnona, F. 169
Budai, R. 163
Bunzl, K. 181

Čarsky, J. 164
Cérná, M. 139
Chabreček, P. 177
Chiavarini, S. 217
Chmielnicka, J. 165
Cremisini, C. 217

De Rose, E. 163, 169
Doupovcová, M. 135
Dutkiewicz, T. 149, 153

Farkas, I. 170
Ferri, T. 217
Filip, Z. 191
Fiserova-Bergerova, V. 162
Fishbein, L. 33
Flek, J. 131

Gescher, A. 131
Goksøyr, A. 255
Gönczi, L. 176
Gori, G. 167, 169
Grandjean, P. 25
Gross, H. 131

Hájek, V. 139
Halik, J. 97
Hano, L. 175
Heberer, H. 101
Hemminki, K. 121
Henschler, D. 9
Hinz, G. 168
Hironaka, R. 281
Hladká, A. 177
Holló, A. 176
Holomáň, J. 175
Hrnčiarová, M. 164
Hüzl, F. 166

Indulski, J. 172

Jablonická, A. 175
Janota, S. 175
Joiková, K. 161
Jones, K.C. 235
Just, A. 168

Zudová, Z. 139

The Science of the Total Environment, 101 (1991) 302–304
Elsevier Science Publishers B.V., Amsterdam

Subject Index

Acid irrigation 181
Acrylonitrile, carcinogenicity 39
Actellic, monitoring of exposure 177
Aflatoxin B, hepatocarcinogenicity and genotoxic effects 179
Agricultural soil 235
Air Quality Guidelines 6
Alcohol intolerance, after trichloroethylene, dimethylformamide, etc. 50
Alkylating agents, biological monitoring 159
Aluminium, serum and urine levels 89
Androgens, growth promoters in food-producing animals 160
Anesthesiologists, halothane exposure 175
—, nitrous oxide exposure 167
Antifouling paints 217
Aromatic amines, biological monitoring 159

Beef cattle 281
Benzene 269
Benzo[*a*]pyrene, in tyre production 171
Biological limits for styrene, toluene and xylene 118
Biomagnification 201
Biotransformation and toxicity of *N,N*-dimethylformamide, styrene and trichloroethylene 50
2-Bromo-2-chloro-1,1,1-trifluoroethane in urine 174
Butadiene, carcinogenicity 39

Cadmium, age and kidney function 30
Carbon disulphide, ischaemic heart disease in workers 97
Chemicals, plastics industry 33
—, rubber industry 33
China, occupational exposure limits 65
Chlorophenols in waters 173
Commingled fuels 269
Concentration factors 201
Cytochrome P450IA1 255

Degradation 235
Dentine 229
Dermal absorption potential of industrial chemicals 162
4,4′-Dichlorobiphenyl 263
N,N-Dimethylformamide, mercapturates in urine 51
—, metabolism of 131
Dimethyl sulphate, DNA-adducts formation, depurination, and imidazole ringopening 121
Dimethylthiophosphate, in pirimiphos-methyl excretion 177
Discrimination factor 201
Drinking Water Guidelines 6

ELISA 255
Environmental Health Criteria documents 5
Environmental pollutants, priorities in Poland 153
Estrogens, growth promoters in food-producing animals 160
Ethylene imine, DNA-adducts formation, depurination and imidazole ringopening 121
Exposure limits, reserve capacity 25
—, in urine and blood 49
—, in various media, relationships 45

Forage sulfur 281
Forest soils 181

Gasoline vapors 269
Gastrointestinal ulcers 229
Genotoxic chemicals, acceptable limits of hemoglobin adducts 159

Haber's law 10
Halothane, cytogenetic analysis of peripheral lymphocytes and immunology tests 175
—, trifluoroacetate in urine 174
Harmonization of activities in chemical safety 6
Hemoglobin adducts, in alkylating agents and aromatic amines monitoring 159
n-Hexane, 2,5-hexanedione in biomonitoring 163
—, 2,5-hexanedione indicator of exposure 169
—, neurotoxicity of 163
2,5-Hexanedione in urine, n-hexane biomonitoring 169
Hormesis, low doses of uranium 161
Humic substances 191
Hygienic standards in the USSR 55

Immunochemistry (ELISA) 255
Indoor air, formaldehyde and nitrogen dioxide 170
—, pentachlorophenol in air and urine 176
Induction 255
International Programme on Chemical Safety (IPCS) 2
Ischaemic heart disease, in workers exposed to carbon disulfide 97
Isopropylbiphenyls, occupational exposure limit 135
Isotachophoretic determination of thiodiacetate and trifluoroacetate 174

Kochia 281

Lead 229
—, phlebotomy and erythropoesis 26
Liming 181
Lipid peroxidation, effect of heavy metal ions and hydrogen peroxide 164
Lithium, serum and urine levels 87
Lithium/aluminium alloys, occupational exposure limits 83
Lung ventilation and solvent uptake 111

Malondialdehyde, erythrocyte membrane lipid peroxidation 164
Mass bathing 275
Mercury, in environment and diets 79
—, neurological abnormalities 29
Metals, industrial and environmental exposure to nickel, chromium, manganese and copper 149
Microbial biodegradation 263
Microbial dehalogenation 263
Mutagenicity of waters 139
Mutagens in the rubber industry 172

Nickel, effect on temperature regulation 31
—, excretion of zinc and copper 165
—, limits for soluble and insoluble compounds 91, 166
—, proteinuria 165
Nitrous oxide, biomonitoring by urine and expired air analysis 167
Nordic Expert Group, modus operandi 17
Norm-setting in the USSR 55

Occupational exposure limits, criteria documents from the Nordic Expert Group 19
—, history in Germany, concept and perspectives 9
—, in China 65
Organochlorine herbicides in water 173
Organotin compounds 217

Pentachlorophenol respiratory and dermal exposure 176
Permissible exposure levels (PEL) in Scandinavian countries 17
Pesticide residues and toxic metals, levels in Czechoslovakia 178
Phenoxyalkanoic acids in waters 173
Pirimiphos-methyl, dimethylthiophosphate excretion 177
Polychlorinated biphenyls, limits in various media and in various countries 48
Polycyclic aromatic hydrocarbons, tyre production 171
Polynuclear aromatic hydrocarbons 235

Radiocesium 181
Refueling emissions 269
Reserve capacity, below exposure limits 25
Rubber, major monomer and additives of carcinogenic, genotoxic and teratogenic concern 39

Saline water 281
Salt marshes 191
Sewage sludge 235
Sex hormones, carcinogenicity 160
Simulation system SONCHES, biological monitoring of solvents exposure 101
Skin, absorption of industrial chemicals 162
Solvent uptake, free fatty acids in serum 111
—, relation to physical activity 11
Southern Baltic 201
Spartina alterniflora 191
Standard setting for chemical substances, in the USSR 55
—, in workplaces in China 65
Styrene, biotransformation of 50
—, carcinogenicity 39
Styrene oxide, DNA-adducts formation, depurination and imidazole ring-opening 121
Sulfur toxicity 281

Toxicokinetic modelling 101
Trace metals 201
trichloroethylene 50
—, intolerance of alcohol 50
—, neurotoxicity and structural CNS damage in rats 168

Tyre production, benzo[*a*]pyrene and polycyclic aromatic hydrocarbons in the breathing zone 171

Uranium, biphasic dose-response relationship 161
USSR, standards setting 55

Vinyl chloride, carcinogenicity 39
—, thiodiacetate in urine 174

Water quality 275
Water quality guidelines 281
